

Model: BA-GB36BN

Grab Bar 36" Brushed Nickel, Knurled

- Material: SS304
- Tube: 1.25" dia.
- Tube Thickness: 18ga
- Flange: 3.125"
- Hardware: Included
- Brand: NERVAL

Tubing

1-1/4" O.D. 18 gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Bent ends of tubing pass thru the flanges and are welded for maximum strength. Intermediate supports are contour cut and joined by welding to form an integral part of the grab bar. All welds ground and polished to blend.

Mandrel bending process maintains uniform bar diameter. Return provides 1-1/2" standard safety clearance between wall and bar.

Strength

When properly mounted, all NERVAL heavy duty grab bar systems meet or exceed the requirements of ANSI Standard A117.1, the ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG), and the Uniform Federal Accessibility Standard (UFAS).

Installation

Verify all rough-in dimensions prior to installation. Secure to wall where adequate in-wall backing exists. Use bar as template to locate mounting holes. Drill holes and set anchors as appropriate. Mount grab bar and secure mounting screws. Snap escutcheons into place.
