

Faucets

NERVAL CORPORATION Care & Maintenance documents provide guidelines on how to care for your NERVAL product. Failure to comply with NERVAL's Care & Maintenance documents voids product warranty.

A damp cloth and mild liquid dishwashing soap may be used for a limited amount of time, followed by rinsing with water and drying with a soft cloth. Most common household cleaners (including mild abrasives) can be used, when used in accordance with the manufacturers' instructions for use. However, all cleaners should be rinsed off thoroughly with water immediately after cleaning your faucet. Avoid using any harsh cleansers (e.g., lime scale removers) or pads/sponges that are unsafe for polished metallic surfaces. Most green, fibrous pads/-sponges contain microscopic mineral particles that can scratch a faucet's finish.

NERVAL suggests the periodic application of a quality non-abrasive wax, such as car wax or furniture wax, especially for matte or textured finishes (e.g., Brushed Nickel, Matte Black). Wax will result in a slight color change, but will not harm the finish. It can be tested on a less visible surface first.

Removing Dried Water Spots

A 50/50 blend of household vinegar and water can be used, followed by rinsing with water and drying with a soft cloth.
