

## Medicine Cabinets

**NERVAL CORPORATION** Care & Maintenance documents provide guidelines on how to care for your NERVAL product. Failure to comply with NERVAL's Care & Maintenance documents voids product warranty.

- The best and safest cleaner for a mirror is clean, warm water used with a soft cloth. Be careful not to allow the edges of the mirror to get or remain wet. If wet, dry immediately.
- If using a commercial glass or mirror cleaner, be sure to use a standard brand of glass or mirror cleaner that does not contain ammonia.
- Never spray any cleaner directly on to a mirror. Instead apply the cleaner to a soft cloth and then wipe the mirror.
- Always use soft, grit-free cloths when cleaning a mirror to reduce chances of scratching the surface.
- Be sure to dry all joints and edges thoroughly to be certain no commercial cleaner comes in contact with the edge and backing.
- Do *not* use an abrasive sponge or brush to clean the powder coated metal surface of the medicine cabinets. This can damage the powder coating and expose the metal, which may result in tarnishing.
